PLP Fiber Optic Products

COYOTE® Taut Closure

A single closure that simplifies branch cable taps or repairs of taut fiber optic cables.

The 6.5" x 38" (165 x 965 mm) COYOTE Taut Closure organizes and protects up to 12 branch splices in either or both directions, or up to 12 pairs of fiber splices for repairing damaged cable.

The end plates are the innovative design used in the COYOTE Dome Closure. Grommets available for the COYOTE Dome Closure can also be used for the COYOTE Taut Closure.

The unique mainframe assembly is designed to protect the fibers being "expressed" through the closure and to organize the splices on those fibers being spliced to the branch cables. Slack fibers from the branch cables or slack fibers between repair splices are stored in the center region of the mainframe.

Catalog Number	Description
8006947	6.5" x 38" (165 x 965 mm) COYOTE Taut Closure Kit

PLP Reliability

The COYOTE Taut Closure is manufactured in accordance with ISO 9001: 2001 procedures to assure quality and is backed by the experience and field support that Preformed has been noted for since 1947.

COYOTE Grommet Kits
